Current Projects

- *Mental Models in Interdisciplinary Teams* This project uses innovative data collection methods to study how interaction in interdisciplinary teams changes ideas and concepts. I began data collection at SESYNC and a paper is in progress.
- *Adaptive Rangeland Management* With Professors Mark Lubell, Ken Tate, and Leslie Roche (UC Davis), we are exploring the institutional and social factors involved with the adoption and diffusion of innovative grazing practices. A paper is in progress.
- *Socio-Ecological Movements in Urban Ecosystems* This project is a large collaboration in which I am working with Professors Mario Diani (University of Trento) and Henrik Ernstson (Stanford, University of Cape Town). I am in charge of the analysis of the 120 organizations interviewed.
- *Public Repository of Socio-Environmental Network Data* I am working to produce a publicly available set of network data concerning environmental policy and management. I will work with the other authors on synthesis papers.
- *Forest, People, Fire* With Professor Paige Fischer (University of Michigan) we are investigating the multiplex networks of fire prevention organizations in Oregon. A substantive paper is under review and a methodological paper is in progress.
